INDEX TO VOLUME 104

"Starred items are Shorter Notes"

Abe, Yoshihiro. *Weakly normal filters and the closed unbounded filter on $P_\kappa\lambda$*, 1226.

Abu-Muhanna, Yusuf and Schober, Glenn. *Nonvanishing meromorphic univalent functions*, 487.

Akcoglu, M. A. *Alternating sequences with nonpositive operators*, 1124.

Alvarez, J. and Durán, R. *L^p continuity of pseudo-differential operators with discontinuous symbol*, 165.

Anderson, David F., Dobbs, David E., Kabbaj, Salah and Mulay, S. B. *Universally Catenarian domains of $D + M$ type*, 378.

Anderson, G. D. and Vamanamurthy, M. K. *Hölder continuity of quasiconformal mappings of the unit ball*, 227.

Arias-de-Reyna, Juan. *A real valued homomorphism on algebras of differentiable functions*, 1054.

Assani, I. *Alternating procedures in uniformly smooth Banach spaces*, 1131.

Assani, I. *Estimates of positive linear operators on L^p*, 193.

Astey, L., Greenberg, P., Micha, E. and Pastor, G. *Some fibred cobordism groups are not finitely generated*, 327.

Avgerinos, Evgenios P. and Papageorgiou, Nikolaos S. *Random nonlinear evolution inclusions in reflexive Banach spaces*, 293.

Baggett, Larry and Merrill, Kathy. *Equivalence of cocycles under an irrational rotation*, 1050.

Baggett, Larry. *On functions that are trivial cocycles for a set of irrationals*, 1212.

Bagiński, Czesław. *The isomorphism question for modular group algebras of metacyclic p-groups*, 39.

Bang, Seung-Jin. *The first Dirichlet Eigenvalue and radius of a geodesic ball*, 885.

Bankston, Paul. *Model-theoretic characterizations of arcs and simple closed curves*, 898.

Bartoszek, Wojciech. *Nonexpansive actions of topological semigroups on strictly convex Banach spaces and fixed points*, 809.

Bator, Elizabeth M. *Pettis decomposition for universally scalarly measurable functions*, 795.

Baumslag, G., Stammbach, U. and Strebel, R. *The free metabelian group of rank two contains continuously many nonisomorphic subgroups*, 702.

Baumslag, Gilbert. *A problem of stallings on the direct square of a free group*, 1007.

Beer, Gerald. *On the Young-Fenchel transform for convex functions*, 1115.

Bell, Murray G. *G_K subspaces of hyadic spaces*, 635.

Bella, A. *Some cardinality properties of hyperspace with the locally finite topology*, 1274.

Bernal, Luis G. *On a theorem of Hardy and Littlewood*, 1078.

Bhattacharya, Tilak. *Radial symmetry of the first eigenfunction for the p-Laplacian in the ball*, 169.

Boggess, A. and Dwilewicz, R. *Subaveraging estimates for CR functions*, 117.

Boyle, Mike. *Eventual extensions of finite codes*, 965.

Breen, Marilyn. *A weak Krasnosel'skii theorem in R^d*, 558.

Bressan, Alberto. *Unique solutions for a class of discontinuous differential equations*, 772.

Brešar, M. *Jordan derivations on semiprime rings*, 1003.

Brislawn, Chris. *Kernels of trace class operators*, 1181.

Brodie, M. A., Chamberlain, R. F. and Kappe, L.-C. *Finite coverings by normal subgroups*, 669.

Buchmann, Johannes and Sands, Jonathan W. *Leopoldt's conjecture in parameterized families*, 43.

Canjar, R. Michael. *Mathias forcing which does not add dominating reals*, 1239.

INDEX TO VOLUME 104

Carothers, N. L. and Dilworth, S. J. *Inequalities for sums of independent random variables*, 221.

Carothers, N. L. and Dilworth, S. J. *Subspaces of $L_{p,q}$*, 537.

Caserta, Francesco. *An application of Baumslag-Solitar nonhopfian groups to finitary automorphisms*, 30.

Cedó, Ferran. *The maximal quotient ring of regular group rings. II*, 357.

Chamberlain, R. F. See Brodie, M. A.

Chandler, Jr., J. D. *Moment problems for compact sets*, 1134.

Chang, K. S. and Ryu, K. S. *A generalized converse measurability theorem*, 835.

Chang, Qing. *Some consequences of the standard polynomial*, 707.

Chao-Xun, Nan. See Jian-Hua, Wang.

Christ, Michael. *Pointwise estimates for the relative fundamental solution of $\overline{\partial}_b$*, 787.

Church, P. T. and Timourian, J. G. *Critical values of Fredholm maps*, 993.

Clark, Bradd and Schneider, Victor. *A characterization of maximal connected spaces and maximal arcwise connected spaces*, 1256.

Coleman, Robert F. *A remark on kernels of reduction*, 699.

Colton, David and Kress, Rainer. *Karp's theorem in electromagnetic scattering theory*, 764.

Comfort, W. W. *Small spaces which "generate" large spaces*, 973.

Conrey, J. Brian and Rubel, Lee A. *Erratum to "On the location of the zeros of the derivative of a polynomial"*, 1002.

D'Souza, Harry. *On the monodromy group of everywhere tangent lines to the octic surface in $\mathbf{P}^3$*, 1010.

Dabrowski, Romuald. *On a natural connection between the entropy spaces and Hardy space $\mathrm{Re}H^1$*, 812.

Damek, Ewa. *An area theorem for one-dimensional semidirect extension of homogeneous groups*, 1279.

de la Torre, A. See Martin-Reyes, F. J.

Deguang, Han. *On A-submodules for reflexive operator algebras*, 1067.

deLaubenfels, Ralph. *Inverses of generators*, 443.

Dellomo, Michael. *The inverse limit of the fundamental groups of branched cyclic coverings*, 321.

Dilworth, S. J. See Carothers, N. L.

Dilworth, S. J. See Carothers, N. L.

Dinculeanu, Nicolae. *Vector-valued stochastic processes v. optimal and predictable variation of stochastic measures and stochastic processes*, 625.

Ditzian, Z. and Totik, V. *Remarks on Besov spaces and best polynomial approximation*, 1059.

Dixon, P. G. *Generalized open mapping theorems for bilinear maps, with an application to operator algebras*, 106.

Dobbs, David E. See Anderson, David F.

Doss, Raouf. *An elementary proof of Titchmarsh's convolution theorem*, 181.

Dow, A., Henriksen, M., Kopperman, Ralph and Vermeer, J. *The space of minimal prime ideals of $C(X)$ need not be basically disconnected*, 317.

Dow, A. and Peters, T. J. *Products and remote points: examples and counterexamples*, 1296.

Dow, Alan. *An empty class of non-metric spaces*, 999.

Du, Ding-Zhu and Hwang, F. K. *Existence of symmetric skew balanced starters for odd prime powers*, 660.

Durumeric, Oguz C. *Manifolds of almost half of the maximal volume*, 277.

Durán, R. See Alvarez, J.

Dwilewicz, R. See Boggess, A.

Earle, Clifford J. *Some explicit real analytic trivializations of the Teichmüller curves*, 503.

Emmannele, G. *On complemented copies of c_0 in L^p_x, $1 \leq p < \infty$*, 785.

Engelking, Ryszard and Pol, Roman. *Compactifications of countable-diamensional and strongly countable-dimensional spaces*, 985.

Faulkner, John R. *Finding octonion algebras in associative algebras*, 1027.

Fehlmann, Richard. *A remark on angular complex dilatations of quasiconformal mappings*, 1071.

Fisher, Yuval, Hubbard, John H. and Wittner, Ben S. *A proof of the uniformization theorem for arbitrary plane domains*, 413.

INDEX TO VOLUME 104

Fonda, Alessandro. *Uniformly persistent semidynamical systems*, 111.
Foran, James. *Dimension of the graph of Riemann integrable functions*, 219.
Forrest, Brian. *Amenability and derivations of the Fourier algebra*, 437.
Freedman, Michael H. and He, Zheng-Xu. *A remark on inherent differentiability*, 1305.
Freiling, C. and Rinne, D. *A symmetric density property: monotonicity and the approximate symmetric derivative*, 1098.
Fuller, Kent R. and Hutchinson, George. *Exact embedding functors and left coherent rings*, 385.
Furuta, Takayuki. *An inequality for some nonnormal operators*, 1216.
Gadbois, Steve. *Mixed-norm generalizations of Bergman spaces and duality*, 1171.
Galé, Jośe E. *Weak amenability of banach algebras generated by some analytic semigroup*, 546.
Garay, Oscar J. *Finite type cones shaped on spherical submanifolds.*, 868.
*Garcia-Ferreira, Salvador. *Nonhomogeneity of certain Baire sets in βX*, 1325.
Garity, Dennis J. and Rohm, Dale M. *Stable maps into the Hilbert cube*, 632.
Gasull, A. and Llibre, J. *On the nonsingular quadratic differential equations in the plane*, 793.
Georgiev, Pando Grigorov. *Mazur's intersection property and a Krein-Milman type theorem for almost all closed, convex and bounded subsets of a Banach space*, 157.
Getzler, Ezra. *Cyclic homology and the Beilinson-Manin-Schechtman central extension*, 729.
Giles, J. R. *Differentiability of distance functions and a proximinal property inducing convexity*, 458.
Gold, Robert and Madan, Manohar. *Kida's theorem for a class of nonnormal extensions*, 55.
González, Santos and Martínez, Conseuelo. *Order relation in quadratic Jordan rings and a structure theorem*, 51.
Gordon, Y., Meyer, M. and Reisner, S. *Zonoids with minimal volume-product—A new proof*, 273.
Gorkin, Pamela. *Functions not vanishing on trivial Gleason parts of Douglas algebras*, 1086.
Gray, Fernando and Ruscheweyh, Stephan. *Functions whose derivatives take values in a half-plane*, 215.
Gritzmann, Peter. *A characterization of all loglinear inequalities for three quermassintegrals of convex bodies*, 563.
Guangxin, Zeng. *A characterization of preordered fields with the weak Hilbert property*, 335.
Guozhen, Li. *The fixed-point index and the fixed-point theorems of 1-set-contraction mappings*, 1163.
Gómez, F. and Muñoz, M. C. *Cut locus contained in a hypersurface*, 584.
Hahn, K. T. and Pflug, P. *The Kobayashi and Bergman metrics on generalized Thullen domains*, 207.
Haibao, Duan. *The Lefschetz number of self-maps of Lie groups*, 1284.
Hankerson, Darrel and Peterson, Allan. *Comparison theorems for eigenvalue problems for nth order differential equations*, 1204.
Hansell, R. W. *Sums, Products, and continuity of Borel maps in nonseparable metric spaces*, 465.
Hare, Kathryn E. *An elementary proof of a result on $\Lambda(p)$ sets*, 829.
Harte, Robin. *A note on generalized inverse functions*, 551.
He, Zheng-Xu. See Freedman, Michael H.
Henriksen, M. See Dow, A.
Hensgen, Wolfgang. *On complementation of vector-valued Hardy spaces*, 1153.
Hentzel, Irvin Roy and Peresi, Antonio Luiz. *Almost Jordan rings*, 343.
Herrero, Domingo A. *Most quasidiagonal operators are not block-diagonal*, 845.
Hildebrand, Adolf and Maier, Helmut. *On gaps between prime numbers*, 1.
Hindman, Neil. *Is there a point of ω^* that sees all others?*, 1235.
Hiraide, K. *Positively expansive maps and growth of fundamental groups*, 934.
Holub, James R. *The regularity of Dunford-Pettis operators*, 89.
Horie, Kuniaki. See Nakagawa, Jin.
Howard, J. *Corrigendum to "Weak sequential denseness in Banach spaces"*, 334.
Hu, Shouchuan. *Fixed points for discontinuous quasi-monotone maps in $\mathbf{R}^n$*, 1111.
Hubbard, John H. See Fisher, Yuval.

INDEX TO VOLUME 104

Huh, Chan. *Invariants of finite abelian groups acting on the algebra of two 2×2 generic matrices*, 716.
Hutchinson, George. See Fuller, Kent R.
Hwang, F. K. See Du, Ding-Zhu.
Hwang, Jenn-Fang. *Phragmén-Lindelöf theorem for the minimal surface equation*, 825.
Ichiishi, Tatsuro. *Alternative version of Shapley's theorem on closed coverings of a simplex*, 759.
Idzik, Adam. *Almost fixed point theorems*, 779.
Ikeda, Hiroshi. *On stability of endomorphisms*, 1287.
Ingram, W. T. *Concerning periodic points in mappings of continua*, 643.
Isbell, John. *d-final continua*, 953.
Ishihara, Hajime and Takahashi, Wataru. *A nonlinear ergodic theorem for a reversible semigroup of Lipschitzian mappings in a Hilbert space*, 431.
Ishihara, Hajime. *Constructive reflexivity of a uniformly convex Banach space*, 735.
Isiwata, Takesi. *Continuity of additive k-metric functions and metrization of k-metric spaces*, 988.
Itoh, Tekehiro. *A characterization of the generalized Veronese surfaces*, 571.
Janas, J. *Toeplitz spectral inclusion and generalized in modulus property*, 231.
Jia, Xing-De. *Simultaneous systems of representatives for finite families of finite sets*, 33.
Jian-Hua, Wang and Chao-Xun, Nan. *Fréchet differentiable points in Bochner function spaces $L_p(\mu, X)$*, 76.
Johnson, David L. *Volumes of flows*, 923.
Kabbaj, Salah. See Anderson, David F.
Kamowitz, Herbert and Wortman, Dennis. *Endomorphisms of an extremal algebra*, 852.
Kang, Ming-Chang. *Metacyclic p-algebras*, 697.
Kannai, Y. and Kiro, S. *The initial value problem for a degenerate wave equation*, 125.
Kappe, L.-C. See Brodie, M. A.
Katsuda, Atsushi. *The isometry groups of compact manifolds with negative Ricci curvature*, 587.
Katz, Daniel. *Note on multiplicity*, 1021.
Katz, Mikhail. *The first diameter of 3-manifolds of positive scalar curvature*, 591.
Keimel, Klaus and Roth, Walter. *A Korovkin type approximation theorem for set-valued functions*, 819.
Kim, K. H. and Roush, F. W. *Undecidability of module homomorphisms*, 374.
Kiro, S. See Kannai, Y.
Kleinfeld, Erwin. *Rings with associators in the commutative center*, 10.
Knopfmacher, Arnold and Knopfmacher, John. *A product expansion in p-adic and other nonarchimedean fields*, 1031.
Knopfmacher, John. See Knopfmacher, Arnold.
Kopperman, Ralph. See Dow, A.
Kress, Rainer. See Colton, David.
Kropholler, P. H., Linnell, P. A. and Moody, J. A. *Applications of a new K-theoretic theorem to soluble group rings*, 675.
Kumar Murty, V. *The Hodge group of an abelian variety*, 61.
Kusano, Takaŝi, Noussair, Ezzat S. and Swanson, Charles A. *Existence of decaying entire solutions of a class of semilinear elliptic equations*, 1141.
Kusano, Takaŝi. See Trench, William F.
Kwong, Man Kam and Zettl, A. *Landau's inequality for the difference operator*, 201.
Kwong, Ying C. *Interior and boundary regularity of solutions to a plasma type equation*, 472.
Larson, Suzanne. *Pseudoprime l-ideals in a class of f-rings*, 685.
Lasiecka, I. and Triggiani, R. *A lifting theorem for the time regularity of solutions to abstract equations with unbounded operators and applications to hyperbolic equations*, 745.
Lassak, Marek. *Covering the boundary of a convex set by tiles*, 269.
Legut, Jerzy and Wilczyński, Maciej. *Optimal partitioning of a measurable space*, 262.
Legut, Jerzy. *Inequalities for α-optimal partitioning of a measurable space*, 1249.
Levenberg, Jr., Norman, Martin, Gaven J., Shields, Allen L. and Zdravkovska, Smilka. *Factorizations of Lebesgue measure via convolutions*, 419.

INDEX TO VOLUME 104

Li, Chi-Kwong. *Polynomials and numerical ranges*, 369.
Lin, Huaxlin. *Ideals of multiplier algebras of simple AF C^*-algebras*, 239.
Linnell, P. A. See Kropholler, P. H.
Lipshitz, Leonard and Rubel, Lee A. *A differentially algebraic replacement theorem and analog computability*, 668.
Livingston, Charles. *The free genus of doubled knots*, 329.
Llibre, J. See Gasull, A.
London, R. R. and Thomas, D. K. *The derivative of Bazilevič functions*, 235.
Lubinsky, D. S. *Jump distributions on $(-1, 1)$ whose orthogonal polynomials have leading coefficients with given asymptotic behaviour*, 516.
Luo, Feng. *The existence of $K(\pi, 1)$ 4-manifolds which are rational homology 4-spheres*, 1315.
Lyons, Russell. *Singular measures with spectral gaps*, 86.
Macki, Jack W., Nistri, Paolo and Zecca, Pietro. *The existence of periodic solutions to nonautonomous differential inclusions*, 840.
Madan, Manohar. See Gold, Robert.
Madych, W. R. and Solmon, D. C. *A range theorem for the Radon transform*, 79.
Maier, Helmut. See Hildebrand, Adolf.
Maitra, A., Rao, B. V. and Srivatsa, V. V. *Some applications of selection theorems to parametrization problems*, 96.
Martin, Gaven J. See Levenberg, Jr., Norman.
Martin-Reyes, F. J. and de la Torre, A. *The dominated ergodic estimate for mean bounded, invertible, positive operators*, 69.
Martínez, Conseuelo. See González, Santos.
Matignon, Michel and Ohm, Jack. *A structure theorem for simple transcendental extensions of valued fields*, 392.
May, Warren. *Modular group algebras of simply presented abelian groups*, 403.
McAloon, K. and Ressayre, J. P. *Independent statements about finite stretchable structures*, 603.
McGuire, Paul. *On the spectral picture of an irreducible subnormal operator*, 801.
McNabb, Alex and Weir, Graham. *Comparison theorems for causal functional differential equations*, 449.
Merrill, Kathy. See Baggett, Larry.
Meyer, M. See Gordon, Y.
Micha, E. See Astey, L.
Moody, J. A. See Kropholler, P. H.
Mulay, S. B. See Anderson, David F.
Muñoz, M. C. See Gómez, F.
Nakagawa, Jin and Horie, Kuniaki. *Elliptic curves with no rational points*, 20.
Nakazi, Takahiko. *A lifting theorem and analytic operator algebras*, 1081.
Nauwelaerts, E. and Ooms, A. I. *Weights of semi-invariants of the quotient division ring of an enveloping algebra*, 13.
Navarro-Bermúdez, Francisco J. and Oxtoby, John C. *Four topologically equivalent measures in the Cantor space*, 859.
Nistri, Paolo. See Macki, Jack W.
Noussair, Ezzat S. See Kusano, Takaŝi.
Ooms, A. I. See Nauwelaerts, E.
Ortel, Marvin and Smith, Wayne. *The argument of an extremal dilatation*, 498.
Oswald, Luc and Paulik, George. *An example of nonhomotopic solutions to the Dirichlet problem for harmonic maps in two dimensions*, 1267.
Oxtoby, John C. See Navarro-Bermúdez, Francisco J.
